

January 5, 2009

I am very pleased to announce that **The Olon Group, Inc.** ("Olon") has acquired **Creative Products, Inc.** ("Creative").

Founded in 1982, Creative is a manufacturer of profile-wrapped mouldings primarily serving the US residential and commercial office furniture markets. With manufacturing operations in Jeffersonville, Indiana, Creative manufactures products similar to Olon's profile-wrapped mouldings, but with an emphasis on larger and unique components often for custom applications.

Headquartered in Georgetown, Ontario, Olon is one of the leading designers and manufacturers of drawer components, profile-wrapped mouldings, polyester edge treatments and decorative laminate products for the North American furniture, residential remodeling and cabinet-making industries. Olon sells products in Canada and the United States to residential and office furniture manufacturers, and cabinetry OEM's, wholesalers and distributors. With the acquisition of Creative Products, Olon now operates out of plants in Georgetown, Ontario, Washington and Jeffersonville, Indiana, and Geneva, Illinois. The Creative Products name that is so well-respected in our industry will become "**Olon Creative Products**".

The Creative acquisition is highly strategic to Olon, enhancing our ability to grow by expanding our product offer, capitalizing on best practice manufacturing processes, and leveraging both supplier and customer relationships. The acquisition also provides the platform to formalize our sales and marketing strategy around three product families: Custom Mouldings; Door and Accessory Mouldings; and Drawer Components.

Combining the strengths and resources of Creative and Olon is a defining milestone in our development and history. Together we will solidify Olon's mission by taking a leadership position as partner of choice for our customers and suppliers and as employer of choice for our Olon associates.

We are very much looking forward to the future and we thank you for your continued support.

Yours truly,
